

mattress **OCEANICO**

1. **KOMFORTAN**[®] foam guarantees optimal elasticity and proper support of the human body to assure your comfort.
2. The **ECOREPUR**[®] foam respects material renewability and environmental protection. It meets the demanding requirements for high mattress stability and durability.
3. **HIGH AERATION** is supported by central channels running across the core.

4. We've designed **SEVEN SEPARATE ANATOMICAL ZONES** to ensure they always adapt to your movement and keep your body in the perfect sleep-inducing position.

5. Unique centre layer shaping **WITHOUT GLUING** ensures practical disassembly during cleaning.

6. **A MAXIMUM LOAD** of up to 140 kg is ensured thanks to the combination of multiple layered materials, guaranteeing a good night's sleep in any position.

7. **The SEAQUAL™** cover helps create a better future for all of us. SEAQUAL™ is a unique initiative involving the cooperation of non-government organisations, fishermen, research workers, scientists, authorities and private entities aiming to clean the bottom and surface of oceans, rivers, beaches and coastlines and free them from plastic waste.

MATTRESS DESCRIPTION:

We believe in **SEAQUAL™** change. The real story of the oceans lacks a happy ending. However, we believe this can change. We therefore decided to help and have introduced the innovative SEAQUAL™ textile comprising recycled fibre into our wide range of mattresses.

SEAQUAL™ cover

Helping build a better future for all of us. SEAQUAL™ is a unique initiative involving the cooperation of non-government organisations, fishermen, research workers, scientists, authorities and private entities aiming to clean the bottom and surface of oceans, rivers, beaches and coastlines and free them from plastic waste.

 Shipping companies collect plastic waste from the bottom of the ocean.

 The recycled plastic, in the form of small balls, goes through a production process resulting in a polyester fibre.

 The plastic is then sorted and subjected to industrial recovery.

 This fibre is then processed to create a textile that is used for our cover.

SEAQUAL™ fibre is created as follows:

ECOREPUR®: The industrial recoverability of material is not just a term for us – it is a daily process. The production of our mattresses generates so-called polyurethane waste. We do not send this waste to landfills, but further process it instead. We sort it, crush it into small pieces, and use it for the production of our ECPURE® foam. The ECPURE® foam has many applications, not only in our mattresses but also in other industrial branches. It is sought-after due to its strength and rigidity.

ABOUT THE COMPANY:

We are a leading Czech mattress manufacturer with a long tradition. We offer mattresses and products for healthy sleep to a wide sector of users from hospitals, hotels, guest houses, spas, long-term care facilities up to home use. Thanks to our many years of experience, we can guarantee that we will stay close to you and continue to improve our mattresses with respect for your wishes.

Our products meet the strict criteria of manufacturing standards. The safety of the materials we use in production is also subject to a close inspection.

INDIVIDUAL APPROACH

When dealing with customers, we prefer an individual approach where we always try to meet all your requirements.

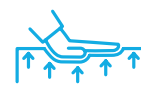

QUALITY

We are a manufacturer with 48 years of experience. The quality of delivered products and work safety is our priority.

MATERIALS

We incorporate traditional materials into our product range, right up to new products just launched on the market such as EKOMFORTAN® and ECPURE®.

TAILOR-MADE PRODUCTS

Thanks to our many years of experience in mattress production, we can prepare mattresses tailored to your needs.

GUARANTEES

We stand behind the quality of our products, which is why we offer an extended warranty.
